

SHUBHSHREE BIOFUELS ENERGY LTD

**"TURNING WASTE INTO WEALTH,
ENERGY INTO IMPACT"**

Shubhshree
Biofuels Energy Ltd.

**A BETTER AIR QUALITY & SUSTAINABLE
GREEN ENERGY**

At SHUBHSHREE BIOFUELS ENERGY LIMITED, we are committed to creating a sustainable energy ecosystem that meets the evolving needs of industries while protecting our natural resources. Our mission is to bridge the gap between rising energy demands and the responsible use of biomass—delivering clean, green, and renewable fuel solutions.

With deep industry expertise and a strong market presence, we've built lasting relationships with leading clients across various sectors. Our focus is on supplying high-quality biomass fuels that support industries such as power plants, process boilers, and industrial furnaces.

We take pride in promoting sustainable energy practices by ensuring a steady and inclusive supply of biomass raw materials. As we move forward, our goal remains clear: to be one of India's most trusted providers of environmentally responsible and cost-effective biomass energy solutions.

Economic & Social Impact

*Job Creation &
Employment*

*Additional
Rural Revenue
Source*

*Save
Pollution*

SHUBHSHREE BIOFUELS ENERGY LIMITED

VISION

Addressing the alarming stubble or parali pollution caused by the widespread practice of burning thousands of acres of paddy fields, which results in severe air degradation

MISSION

Creating sustainable biofuel from residual waste materials offers a high- quality alternative energy source, essential for preventing the irreversible depletion of fossil fuels.

OUR GOALS

- *Lead in biomass fuel solutions across India.*
- *Industrial carbon footprints boost local economies.*
- *Through resource utilisation support India's green.*
- *Energy shift enable sustainable industrial growth.*

OUR CORE VALUES

- *Sustainability: Eco-friendly and renewable energy focus*
- *Cost-Efficiency: Affordable, high-quality biomass solutions*
- *Environmental Responsibility: Reducing carbon emissions*
- *Local Empowerment: Promoting use of indigenous resources*
- *Innovation: Evolving with industry needs*

ABOUT US

- 12+ years of expertise in biomass briquettes and pellets manufacturing.
- Converts agricultural and bio-waste into clean, sustainable energy.
- Offers eco-friendly fuel alternatives to conventional sources.
- Promotes environmental sustainability and waste value creation.
- Supports communities and industries with reliable green energy solutions.

WHAT IS BIOMASS BRIQUETTES & PELLETS?

An eco-friendly process transforms agricultural, forestry, and Agro-industrial waste into solid biofuels known as briquettes and pellets. These compact, cylindrical-shaped blocks are produced by compressing materials such as mustard husk, groundnut shells, rice husk, paddy straw, sawdust, sugarcane waste, and other agricultural residues—without the use of any chemicals or binders. This sustainable solution not only reduces waste but also provides a cleaner, renewable alternative to conventional fossil fuels.

Briquettes and pellets produced by Shubhshree Biofuels Energy Limited offer a high gross calorific value (GCV), ranging from 3000 GCV to 4800 GCV. Our state-of-the-art production facilities convert these raw materials into high-yield briquettes and pellets, which are then efficiently distributed across various states. These biofuels are supplied to end- users, including biofuel process boilers and furnaces, through a dedicated and reliable transportation network.

LONGER BURNING DURATION

Compressed briquettes burn for a lot longer

CONCENTRATED FORM OF ENERGY

Use of compressed combustible material

HIGHER AND EFFICIENT HEATING

Intense heat, Higher Calorific Value 3k-5k

LESS SMOKE OR LITTLE FLY ASH

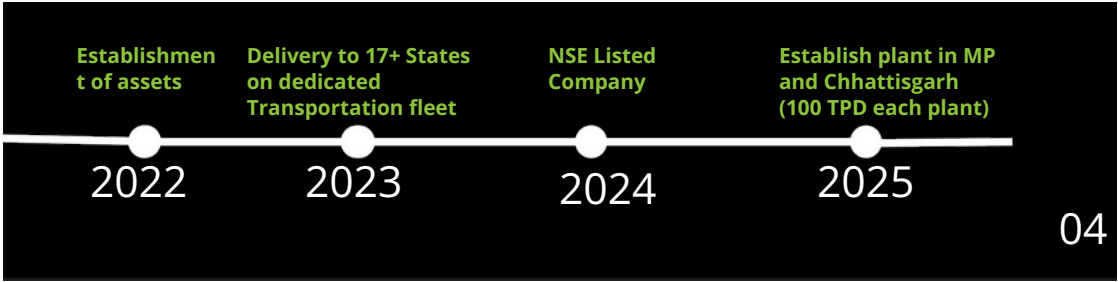

Low smoke, soot toxic gases or carbon deposit

RAW MATERIAL SOURCES

Available from agro based & plant based Biomass

SUSTAINABLE RAW MATERIAL

Organic & Recyclable bio- mass as raw material

SHUBHSHREE BIOFUELS ENERGY LIMITED

SHUBHSHREE BIOFUELS CREDENTIALS

01

PRODUCT FOCUS

Specializes in biomass briquettes and pellets—clean, renewable, and coal-replacing.

02

SUSTAINABILITY

Uses agricultural waste, promoting rural economy and reducing carbon footprint.

03

GOVERNMENT ALIGNMENT

Aligned with national biomass blending mandates and clean energy targets.

04

PRODUCTION EFFICIENCY

Operates high-capacity pelleting machines with daily output of 132 tones.

05

FINANCIAL GROWTH

Achieved over 59% year-on-year revenue growth and 36% rise in profit after tax.

06

MARKET POSITION

Successfully listed on the NSE SME platform, ensuring transparency and credibility.

07

REGIONAL ADVANTAGE

Strategically located near raw material sources in agro-rich regions of North India.

08

SCALABILITY

Designed for modular growth; potential to expand into more states and sectors.

09

ENVIRONMENTAL IMPACT

Helps reduce industrial dependence on coal and fossil fuels through cleaner energy.

10

INVESTMENT APPEAL

Offers early-stage growth potential with a sustainable and scalable business model.

Conclusion

Shubhshree Biofuels distinguishes itself through strong fundamentals, rapid financial growth, and a sustainability-driven business model. Its focus on biomass fuels positions it as a key player in India's clean energy transition, with notable advantages in raw material sourcing, policy alignment, and regional demand.

OUR INFRASTRUCTURE

We pride ourselves on advanced infrastructure, modern machinery, and efficient raw material sourcing—ensuring smooth, cost-effective operations. Our briquettes and pellets have higher bulk density and lower moisture, reducing smoke and extending burn time for better fuel efficiency and cost savings. Backed by a reliable delivery fleet, we ensure top-grade products at competitive prices—delivered on time, every time.
